PROJECTS

SMALLCASE

Smallcase is a web application for investing in different finance products/schemes.

Features:

- User authentication
- Search with debouncing
- Api for different tasks
- Products sorting by Price, Strategy and level of risk

Tech Stack: Tailwind | HTML | CSS | Javascript | Json--server

Areas of responsibility:

- Created api for authentication and storing the available products.
- Made the authentication system, frontend for it, integrated and modularised for reusability.
- Made news sections page with efficient searching functionality using debouncing.
- Made products view page with all functionalities of sorting with price, level of risk - low, mid or high and the investment strategies.

A collaborative project built by a team of 5 executed in 10 days.

YESSTYLE

Yesstyle is an e-commerce site involved in the beauty and wellness section.

Features:

- Dashboard page with timer functionality.
- Data transfer throughout the pages.
- Cart page with a fully dynamic checkout popup box.

Tech Stack: HTML | CSS | JAVASCRIPT

Areas of Responsibility:

- Created a dashboard page in collaboration with another team member and built timer logic and integrated it with the frontend.
- Worked on data transfer using local storage throughout the pages.
- Built cart page with fully dynamic checkout box which pops up when there is at least one product in the cart and pops-out when there are none.

A collaborative project built by a team of 4 executed in 6 days.
